## SUMMARY

Information Technology student (B.S., May 2027) who ships full-stack applications across the .NET, Node.js, and PHP ecosystems, backed by coursework in networking, database design, and system administration. Recent work pairs an ASP.NET Core 8 MVC web app with a Python FastAPI LLM service and a containerized SQL Server database. Seeking a software engineering, IT, or cloud internship.

## TECHNICAL SKILLS

**Languages:** C#, Python, JavaScript, TypeScript, PHP, SQL, PowerShell, HTML/CSS

**Frameworks & Web:** ASP.NET Core 8 MVC, FastAPI, Node.js/Express, React, Entity Framework Core, REST API design

**Databases & Cloud:** SQL Server, MySQL, relational modeling & normalization, Docker, Git/GitHub, GitHub Actions, Azure App Service (learning)

**AI Engineering:** LLM API integration, prompt engineering, structured output parsing, AI service architecture

**Systems & Networking:** TCP/IP, LAN/WAN, VPN, switching & routing, Office 365, VMware/Omnissa, Cisco Packet Tracer

## EDUCATION

**The University of Toledo** — Toledo, OH

Expected May 2027

Bachelor of Science in Information Technology

*Relevant Coursework: Database Systems, Web Application Development, Networking, System Administration, Scripting*

## PROJECTS

**RubricGuardian — AI Assignment Compliance Checker** | ASP.NET Core 8 MVC, Python FastAPI, SQL Server, Docker, EF Core, LLM API

- Built a full-stack tool that checks student assignment submissions against instructor rubrics and returns structured, criterion-by-criterion feedback instead of a single opaque score.
- Architected a two-service system: an ASP.NET Core 8 MVC app handling authentication, submissions, and results, communicating over REST with a Python FastAPI service running the LLM analysis pipeline.
- Modeled the data layer with Entity Framework Core against SQL Server in Docker, using code-first migrations and seeded demo data for reproducible local setup.

**Timalsina Masala Pasal — E-Commerce Web Application** | Node.js, Express, JavaScript, REST APIs

- Developed and deployed a production e-commerce site for a family-owned spice shop, including a product catalog, order tracking, admin dashboard, and sales analytics.
- Hardened the backend with session-based admin authentication, server-side price recalculation to prevent client-side tampering, rate limiting, security headers, and image upload handling via Multer.

**MedRx — Pharmacy Database System** | PHP, MySQL

- Designed a normalized relational schema for prescription, patient, and inventory management, implemented behind a PHP application with role-based access for pharmacists and administrators.

**Developer Portfolio & Field Journal** | React, TypeScript, Vite, Tailwind CSS, JavaScript

- Built and deployed a React/TypeScript portfolio to GitHub Pages with a custom design system and a data-driven project catalog, plus Field Journal, a responsive multi-page travel site with interactive galleries, charts, and dynamic UI components in vanilla JavaScript.

## EXPERIENCE

**Student Worker** | The University of Toledo / Chartwells — Toledo, OH

Jan 2023 – Dec 2023

- Delivered customer service in a high-volume campus dining environment while maintaining accuracy under time pressure.
- Troubleshoot day-to-day operational issues and coordinated with teammates to keep service workflows running efficiently.

## LEADERSHIP & ACTIVITIES

- Active member, International Student Association — supported campus events and student engagement initiatives.
- Independently designed, developed, and deployed a live website for a family-owned business, handling requirements, build, and hosting end to end.
