

RATISH TIMALSINA

573-355-2475 | rtimals@rockets.utoledo.edu | linkedin.com/in/ratish-timalsina

Professional Summary

Information Technology student (B.S., May 2027) with hands-on experience in networking, system administration, web development, database design, and technical support. Skilled in building full-stack applications, troubleshooting technology issues, and supporting reliable IT solutions. Familiar with AI-assisted development, prompt engineering, generative AI tools, and configuring simple AI workflows. Seeking an internship opportunity to apply technical skills while continuing to grow in software, infrastructure, and emerging technologies.

Technical Skills

Programming & Scripting: Python, PowerShell, PHP, JavaScript, HTML/CSS, SQL
AI & Emerging Technologies: Prompt Engineering, AI-Assisted Development, Generative AI Fundamentals, ChatGPT, Claude, AI Workflow Design, Basic AI Agent Configuration
Web & Frameworks: Node.js (Express), RESTful APIs, JSON, Responsive Web Design
Databases: MySQL, Relational Database Design & Modeling
Systems & Networking: Office 365, VMware/Omnissa, Cisco Packet Tracer, VPN, LAN/WAN, TCP/IP, Switching & Routing Fundamentals, OSI Model
Tools: Git/GitHub, VS Code, Postman

Education

The University of Toledo, Toledo, OH
Bachelor of Science in Information Technology | Expected May 2027

Professional Experience

Student Worker | The University of Toledo / Chartwells | Jan 2023 – Dec 2023

- Delivered high-quality customer service in a fast-paced environment.
- Demonstrated reliability, teamwork, and strong time-management skills.
- Resolved operational challenges and supported daily business operations.
- Collaborated with team members to maintain efficient workflows and customer satisfaction.

Projects

Timalsina Masala Pasal — E-Commerce Web App

- Built a full-stack e-commerce platform using HTML, CSS, JavaScript, and Node.js (Express). Developed REST APIs, order tracking functionality, admin dashboards, and sales analytics.

MedRx Pharmacy Database System

- Designed and implemented a pharmacy management system using PHP and MySQL. Created normalized database structures and complex SQL queries for prescription management.

Field Journal — Travel Website

- Developed a responsive multi-page website with interactive galleries, charts, accordions, and dynamic user interface features using HTML, CSS, and JavaScript.

The Garage — Used Car Dealership Website

- Built a professional multi-page dealership website showcasing inventory, services, and business information with responsive design principles.

AI Knowledge Assistant

- Created a simple AI-powered assistant using prompt engineering techniques and structured knowledge resources. Designed reusable prompts and explored AI workflow automation concepts.

Leadership & Activities

- Active member of the International Student Association.
- Assisted with campus events and student engagement initiatives.
- Independently designed, developed, and deployed a website for a family-owned business.
